

# **Appendix E**

## **Overheads**

# WHAT IS WILDERNESS?

The 1964 Wilderness Act defines wilderness as an area...

“Where the earth and its community of life are untrammeled (uncontrolled) by man...”

“Which generally appears to have been affected primarily by the forces of nature, with the imprint of man’s work substantially unnoticeable...”

“Where man himself is a visitor who does not remain...”

“Which has outstanding opportunities for solitude or a primitive and unconfined type of recreation...”

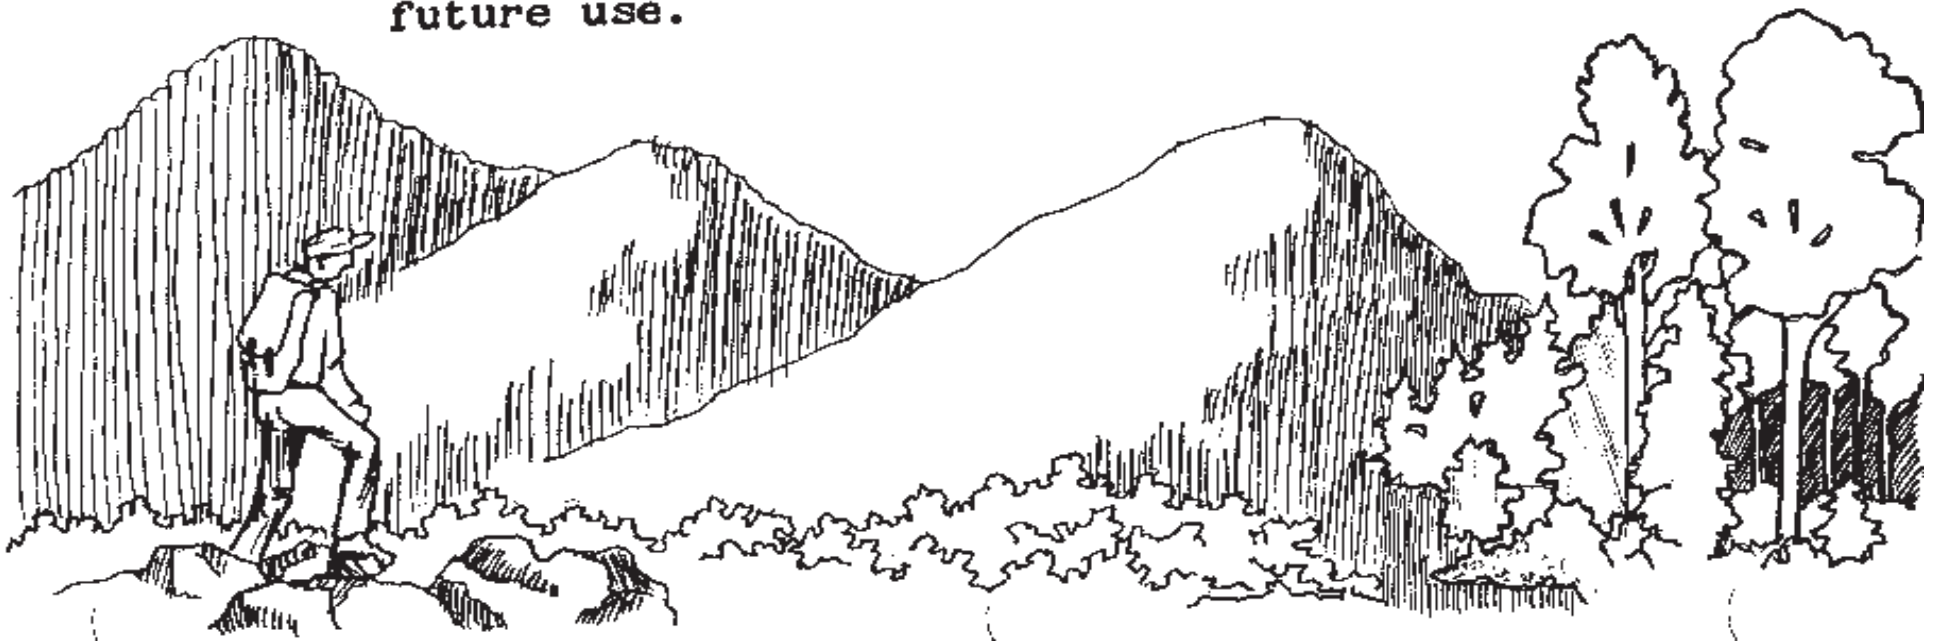

# WILDERNESS MANAGEMENT

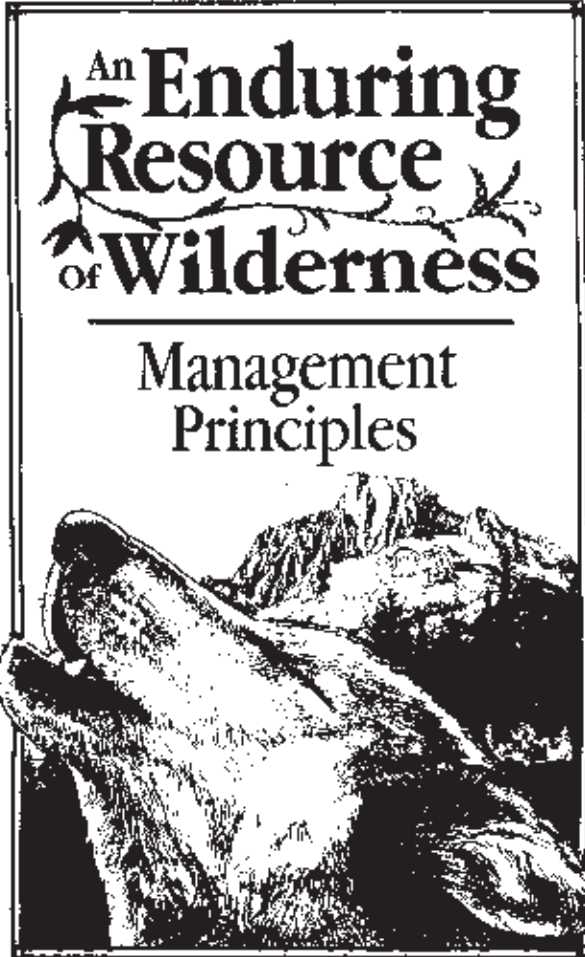

The Wilderness Act says wilderness shall be managed...

To protect and preserve its natural conditions and wilderness character and...

For the use and enjoyment of the American people in such a manner as will leave them unimpaired for future use.

future use.

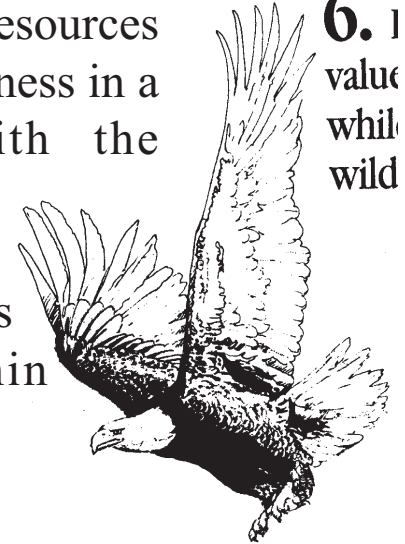

**1.** Manage wilderness as a distinct resource with inseparable parts.

**2.** Manage the use of other resources and activities within wilderness in a manner compatible with the wilderness resource.

**3.** Allow natural processes to operate freely within wilderness.

**6.** value  
wild

**4.** Attain the highest level of purity in wilderness character within legal constraints.

**5.** Preserve wilderness air and water quality.

**6.** Produce human values and benefits while preserving wilderness character.

**7.** Preserve outstanding opportunities for solitude or a primitive and unconfined recreation experience in each wilderness.

**8.** Control and reduce the adverse physical and social impacts of human use in wilderness through education minimum regulation.

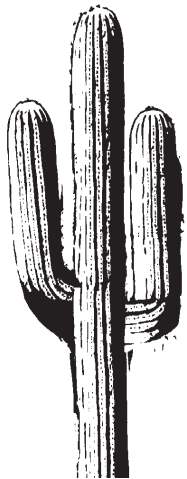

**9.** Favor wilderness dependent activities when managing wilderness use.

**10.** Exclude the sight, sound and other tangible evidence of motorized equipment or mechanical transport wherever possible within wilderness.

**11.** Remove existing structures and terminate uses and activities not essential to wilderness management or not provided for by law.

**12.** Accomplish necessary wilderness management work with the “minimum tool.”

**13.** Establish specific management objectives, with public involvement, in a management plan for each wilderness.

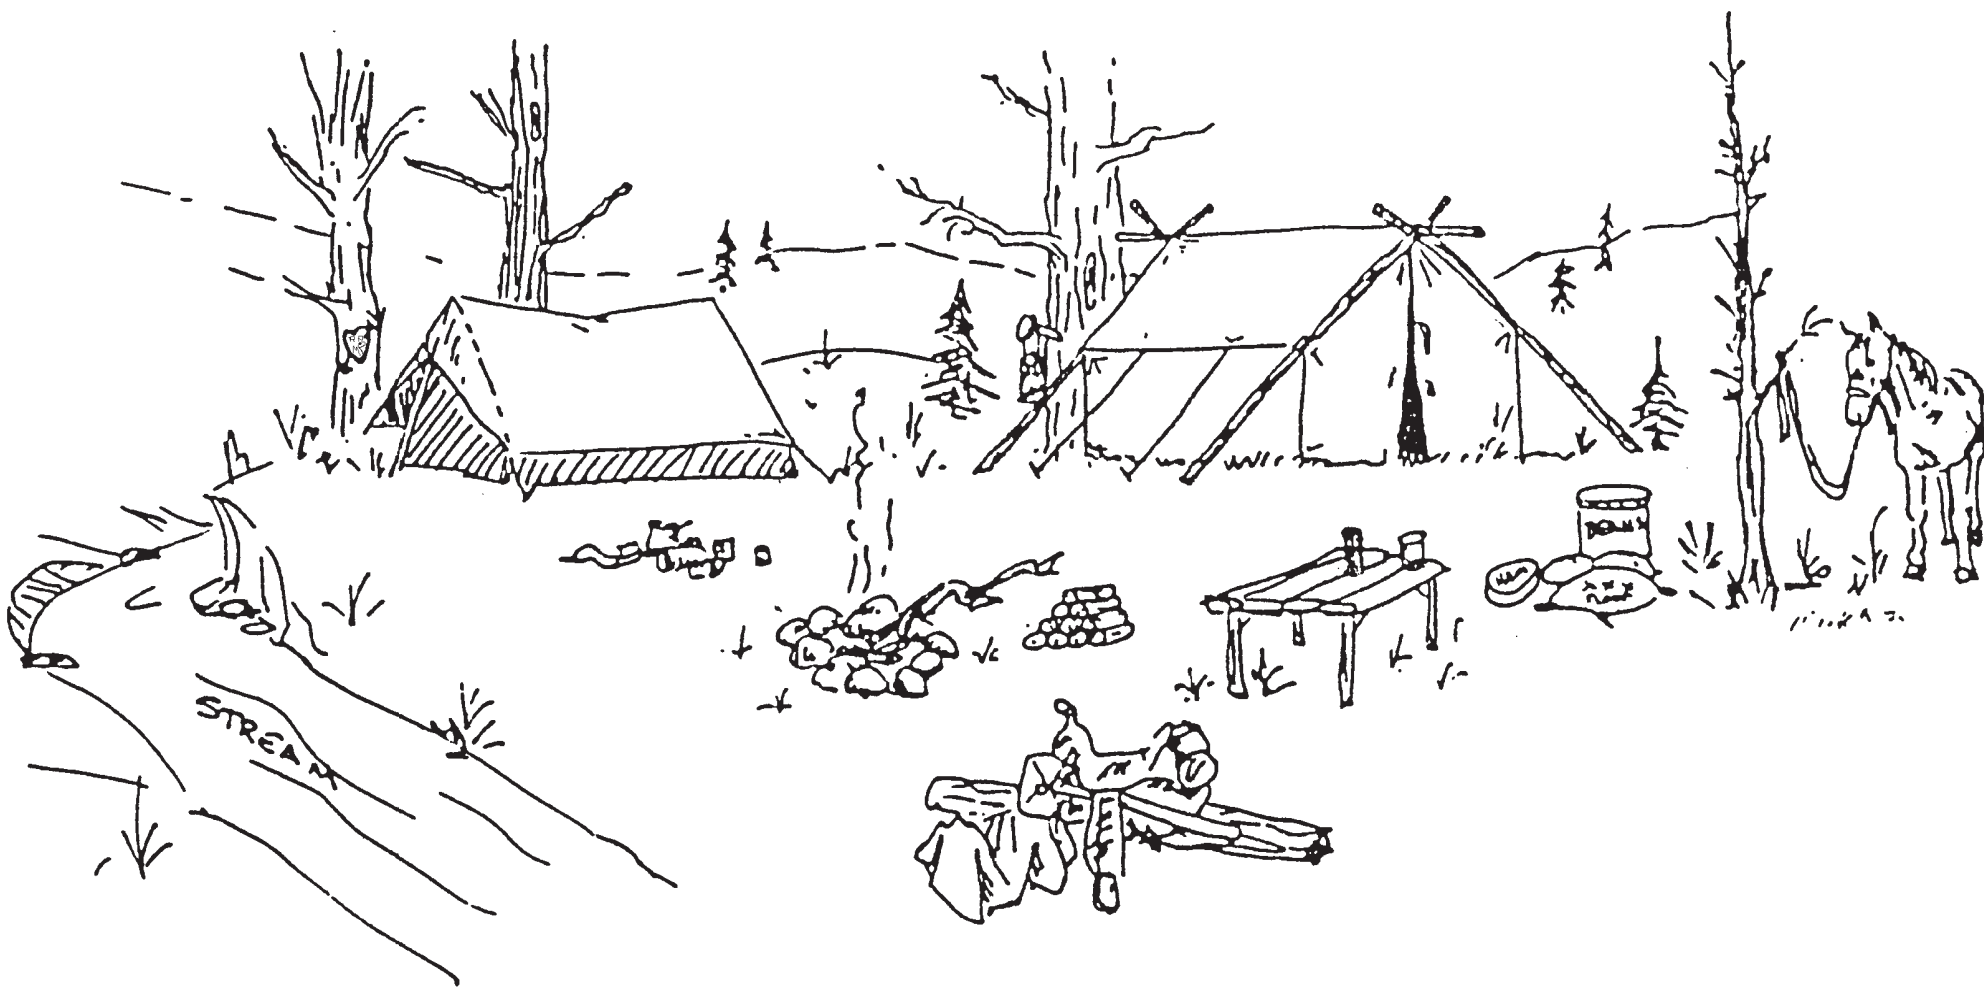

**14.** Harmonize wilderness and adjacent land management activities.

**15.** Manage wilderness with interdisciplinary scientific skills.

**16.** Manage special exceptions provided for by wilderness legislation (for example, mining, grazing and access to private lands) with minimum impact on the wilderness resource.

# Help Molly find the seven things that prevent this from being a minimum impact camp

- 1) too close to water 2) carving in tree 3) trash 4) rock ring camp fire 5) nail in tree 6) food left out 7) horse tied to small branch
